

# Sharp/NEC & TeamViewer

Effortlessly manage and support Sharp professional displays with TeamViewer.

Sharp and TeamViewer have joined forces to bring unparalleled ease, security, and scalability to the management of professional displays. This collaboration combines Sharp's cutting-edge hardware with TeamViewer's industry leading remote access and support software platform. Together, we are empowering businesses and service providers to efficiently provision, monitor, and support their displays across widely distributed and diverse environments like retail signage, transportation, as well as corporate spaces. With solutions designed for large-scale operations, this partnership enables organizations to enhance their service capabilities and ensure seamless device support and up-time.

## Sharp/NEC & TeamViewer: Elevating Commercial Display Operations

### Benefits:

- Provide **end-to-end encrypted support** – both attended and unattended – for Sharp commercial displays.
- Prevent **unauthorized connections** and ensure access is based on permissions and company policies.
- Streamline **at scale rollout and provisioning processes** for Sharp displays with minimal effort.
- Easily leverage existing **device or asset management platforms** through pre-built TeamViewer integrations.
- Minimize **downtime and reduce service costs** through proactive issue resolution.
- Easy **enrollment of devices** using configuration IDs.

## Supported Models

**Large Format Displays:** ME2 Series

**Interactive Displays:** LM Series, L2B Series

Enhance your commercial display operations with the powerful combination of Sharp professional displays and TeamViewer's innovative remote access and support platform. Simplify management, secure your infrastructure, and scale your support with confidence.
